**Chief Complaint:** tinnitus (AS)

### Audiological Results:

Type and Degree: A comprehensive audiological evaluation revealed AC/BC thresholds demonstrated normal peripheral hearing sensitivity R>L.

Speech Recognition Thresholds (SRT): speech recognition thresholds were in agreement with the

pure-tone average (AU).

Word Recognition Scores: 100% (AD) and 100% (AS) at most comfortable loudness levels (MCL).

Tympanometric Results: tympanometric measures were performed and revealed normal middle ear pressure, volume, and compliance suggesting normal middle ear functioning bilaterally.

Right Ear Ipsilateral AR (stim right ear): present

Left Ear Ipsilateral AR (stim left): present

Right Ear Contralateral AR (stim left ear): absent

Left Ear Contralateral AR (stim right ear): absent

**Impressions** : Today's results revealed a slight asymmetrical configuration above 2KHz.

**Rx:** Consult with otolaryngologist.

Annual reevaluation or sooner should concerns arise.

Practice hearing conservation when in the presence of excessive noise. Prevent noise-induced hearing loss with the use of earplugs, earmuffs, and/or custom made noise plugs.
